About the Training Program

We are in an era where Android operating system has penetrated the nook and corner of the world. Android is most popular mobile phone technology in use today. In order to learn Android Development one need to be trained in its fundamental and methodologies and hence proper training is necessary. Expand your mobile app reach through this Android development and programming training course. The mobile applications have a preference over the web based solutions because they are more transformative than the web and are growing at a much faster rate. Android's open source platform offers compatibility with a wide range of devices, which provide global access to the mobile market.

- Describe the platforms upon which the Android operating system will run.
- Create a simple application that runs under the Android operating system.
- Access and work with the Android file system.
- Create an application that uses multimedia under the Android operating system.
- Access and work with databases under the Android operating system

Resource Persons

Senior and renowned Faculty in the field of Android application development from reputed organization which works as grooming centre for graduates in IT fields and having excellent liaison with industry.
