(*)POE (Practical & Oral Examination)

Legends: L- lecture, T-Tutorial/teacher guided theory practice, P-practical, ESE-End semester examination, PA- Progressive Assessment.

2. RATIONALE

This subject intends to teach the students 'learning to learn ' Graduate Attribute with an aim to develop attributes like confidence, initiative, ability to tackle new problems, spirit of enquire, planning and decision making skills, ability of self-directed learning which is required for lifelong learning , habit of keeping proper records and present a formal comprehensive report of their work. It also tends to mold students towards integrating the knowledge acquired throughout life and applying it to the real life projects, in order to gain the confidence of acquiring Engineering skills and thus fulfill the objective of Diploma Programme.

3. COMPETENCY

The aim of this course is to attend following industry identified competency through various teaching learning experiences:

- Study Emerging trends with respect to project.
- Perform the Literature survey
- Identify the problem and present the seminar, Report writing, Project Plan
- Implement the project plan to solve the identified problem by integrating various types of skills acquired during the programme.

4. COURSE OUTCOMES (COs)

The practical experiences and relevant soft skills associated with this course are to be taught and implemented, so that the student demonstrates the following industry oriented COs associated with the above mentioned competency:

- 1.Define the problem from Project Development point of View.
- 2. Apply various Design methodologies to the Projects.
- 3.Practice Use of Designing tools on Real problem
- 4.Consider the ethical issues related to seminar (if any)
- 5.Assess the impact of seminar on society
- 6.Prepare the seminar reports with action plan and time duration.
- 7.Integrate various components
- 8.Test Various components
- 9.Create working Model

5. SUBJECT GUIDELINE REGARDING IMPLEMENTATION:

| Sr.No. | Name of Experiment/Assignment |
|--------|---|
| 1 | Project can be Hardware or Software or Combination of Both. It must involve logic building and application of various technologies learnt during Diploma Completion |
| 2 | May Form a team of students as per industry roles- Developers, testers, Business Analysts, Project managers, Customers. Assign this team a project. Each group is to be assigned a guide faculty. Project titles are to be decided in co-ordination with Faculty. |
| 3 | Student should maintain a project diary and note down all the progress steps and details in the diary. Faculty should check the diary each week and accordingly interact with students based on the progress show and keep proper nothing's. Impart proper guidance. This will assist in proper evaluation of students. |
| 4 | Evaluation of Project should be based on Topic Selection, Technical Contents and Content Understanding, Content Delivery and Response to the Questions. |

| 5 | Students Must Submit One Hard copy and one softcopy each of Seminar report | | | | | | |
|---|--|--|--|--|--|--|--|
| | These titles are to be covered in Project Report: | | | | | | |
| | a. Problem Definition | | | | | | |
| | b. Platform and/Hardware Specifications | | | | | | |
| | c. Feasibility Study. | | | | | | |
| | d. Various Design UML charts/diagrams as applicable like Use Case Diagram, | | | | | | |
| | Activity Charts, Class Hierarchy, DFD, CFD, ER-Diagrams or any other | | | | | | |
| | e. Cost Estimation | | | | | | |
| | f. Time Estimation | | | | | | |
| | g. Limitations | | | | | | |
| | h. Use | | | | | | |
| | i. Future Scope/Extendibility | | | | | | |
| | j. Books/References/Websites | | | | | | |
| | (Other titles may be added and used as applicable, based on the nature of project) | | | | | | |

| Sr.No | Performance Indicators | Weightage in % |
|-------|--------------------------------|----------------|
| a. | Topic Selection | 10 |
| b. | Project diary and reporting | 10 |
| с. | Technical knowledge | 10 |
| d. | Content understanding, | 15 |
| e. | Content Delivery, Presentation | 10 |
| f. | Efficient Designing | 15 |
| g. | Project Report Writing | 10 |
| h. | Response to Questions | 10 |
| i. | Submission of report in time | 10 |
| | Total | 100 |

6. MAJOR EQUIPMENT/ INSTRUMENTS REQUIRED

NA

7. THEORY COMPONENTS

NA

8. SUGGESTED SPECIFICATION TABLE FOR QUESTION PAPER DESIGN

NA

9. SUGGESTED STUDENT ACTIVITIES

Following are the suggested student-related *co-curricular* activities which can be undertaken to accelerate the attainment of the various outcomes in this course: Students should conduct following activities in group and prepare reports of about 5 pages for each activity, also collect/record physical evidences for their (student's) portfolio which will be useful for their placement interviews:

a. Search information about more Emerging trends and prepare a report on it.

- 10. SUGGESTED SPECIAL INSTRUCTIONAL STRATEGIES (if any) NA
- 11. SUGGESTED MICRO-PROJECTS *NA*
- 12. SUGGESTED LEARNING RESOURCES NA

2. RATIONALE

This subject intends to teach the students 'learning to learn ' Graduate Attribute with an aim to develop attributes like confindence , initiative , ability to tackle new problems , spirit of enquire , planning and decision making skills , ability of self directed learning which is required for life long learning , habit of keeping proper records and present a formal comprehensive report of their work.

3. COMPETENCY

The aim of this course is to attend following industry identified competency through various teaching learning experiences:

- Study Emerging trends with respect to project.
- Conduct the Literature survey
- Identify the problem and present the seminar, Report writing, Project Plan, etc

4. COURSE OUTCOMES (COs)

The practical experiences and relevant soft skills associated with this course are to be taught and implemented, so that the student demonstrates the following industry oriented COs associated with the above mentioned competency:

- 1. Select, collect and use required information on Emerging trends.
- 2. Logically choose and study relevant possible Emerging trend for Seminar and project.
- 3. Consider the ethical issues related to seminar (if any)
- 4. Assess the impact of seminar on society
- 5. Prepare the seminar reports with action plan and time duration.

5. Subject Guideline regarding implementation:

| Sr.No. | Name of Experiment/Assignment |
|--------|--|
| 1 | Seminar should be on Technical Topic only on Emerging trends with respect to the project. |
| 2 | Evaluation of Seminar should be based on Topic Selection, Technical Contents and Content Understanding, Content Delivery and Response to the Questions. |
| 3 | Students Must Submit One Hard copy and one softcopy each of Seminar report |

| Sr.No | Performance Indicators | Weightage in % |

2. RATIONALE

Due to globalization and competition in the industrial and service sectors the selection for the job is based on campus interviews or competitive tests. While selecting candidates a normal practice adopted is to see general confidence, ability to communicate and attitude, in addition to basic technological concepts. The purpose of introducing professional practices is to inculcate soft skills through active learning. Micro-Project, MOOCs courses, Industrial visits, expert lectures and related presentations and/ group discussions on technical topics are planned so that there will be increased ,active participation of students in learning process and hence impart lifelong learning ability.

3. COURSE OUTCOMES (COs)

The theory, practical experiences and relevant Professional skills associated with First and second semesters courses are to be taught and implemented, so that the student demonstrates the following industry oriented COs associated with the above mentioned competency:

- 1. Apply acquired knowledge
- 2. Learn independently and develop life long learning ability.
- 3. Work in group.
- 4. Learning through observations and Interactions.
- 5. Understand and prepare Reports.

(An Autonomous Institute of Govt. of Maharashtra)

Scheme: 180 OB

4. PRACTICALS / EXERCISES

The practicals in this section are PrOs (i.e. sub-components of the COs) to be developed and assessed in the student for the attainment of the competency:

| Sr. | Learning Outcome | | | Approx. |
|-----|--|---|-------|---------|
| No | | Practical Exercises | Marks | Hrs. |
| · 1 | a. Application and integration of knowledge from minimum three course outcomes of two courses for development of a project. b. Write reports and state outcomes achieved. c. Work in group d. Present/Demonstrate project | Micro-Project – a) Microproject allocation and development (06-08 hrs.) Faculty must allocate one real life simple problem statement(least complexity) for Microproject which is combination of application of minimum two courses learnt/being learnt during First and Second semesters to a group of 3-4 students. The problem statement must involve simple logic building which can be designed and implemented within 06-08 hours. b) Report Writing : Not more than 7-8 pages (to be prepared simultaneously with development) a. Problem Definition b. Platform and/Hardware Specifications c. Flow charts/diagram related to microproject d. Source Code/Related Procedure for Micro-Project e. Outcome (Technical/Personal) achieved f. Books/References/Websites. c) Microproject Presentations/Demonstrations (04 hrs.) (Preferrably by arranging Project exhibition/ classroom presentations as is | 20M | 12 |
| 2 | a. Learn from alternate sources.b. Enhance self learning ability | applicable) MOOCs (Massive open online courses): Undertake SWAYAM/NPTEL/Spoken Tutorial/Any other Online Courses learning courses and certificate courses Each individual student can select any relevant online course under the guidance of | 10M | 10 |
| 3 | a. Interpersonal skill and personal skill development. b. Develop conflict resolution ability. | course teacher as per interest areas. Group Activity: Group Activity: Case studies to be discussed in a group and presentation of the same by group and summarization by group leader. | 5M | 06 |

(An Autonomous Institute of Govt. of Maharashtra)

Scheme: 180 OB

| | | Role play by individual/group leader. Sharing of self -experiences in a group. Out of above three any one activity can be conducted for group of students. Different groups can be considered for different activities based on their likings. | | |
|---|---|---|-----|----|
| 4 | a. Learning through observations. b. Understanding professional environment. c. Report writing. | Industrial Visit Industrial visits must be arranged for fulfilling the requirement of programme/ course outcomes of undertaken courses of first and second semester and report of the same should be submitted by the individual student, to form a part of the term work. | 07M | 02 |
| 5 | a. Understanding industry practices or evolving concepts. b. Report writing . | Expert Lecture Lectures by Professional / Industrial Expert to be organized to bridge the gap of learnt/ undertaken courses during first and second semester. Probably the Professional / Industrial Expert can be organized in the following areas - 1. Project presentation tips. 2. Spoken English. 3. Personality development. 4. How to develop positive thinking. 6. Any topic related to social awareness 7. Hygiene Awareness 7. Any other topics. | 08M | 02 |
| | | Total | 50 | 32 |

| Sr.No. | Performance Indicators | Weightage in Marks |
|--------|------------------------|-----------------------|
| a. | Micro-Project – | 20 |
| b. | MOOCs | 10 |
| с. | Group Activity | 05 |
| d. | Industry Visit | 07 |
| e. | Guest Lecture | 08 |
| | Total | 50 |

5. MAJOR EQUIPMENT/ INSTRUMENTS REQUIRED

The major equipment with broad specification mentioned here will usher in uniformity in conduct of practicals, as well as aid to procure equipment by authorities concerned.

(An Autonomous Institute of Govt. of Maharashtra) Scheme: 180 OB

| Unit | Unit Title | Teaching/PR | Distribution of Theory Mark | | | Iarks |
|------|-----------------------------|-------------|-----------------------------|-------|-------|-------|
| No. | | Hours | R | U | Α | Total |
| | | | Level | Level | Level | Marks |
| Ι | Micro-Project | 12 | | | | |
| II | MOOCs: SWAYAM-NPTEL | 10 | | | | |
| | and Spoken Tutorial Courses | 10 | | | | |
| III | Group Activity | 06 | | | | |
| IV | Industrial Visit | 02 | | | | |
| V | Expert Lecture | 02 | | | | |
| | Total | 32 | | | | |

6. SPECIFICATION TABLE FOR QUESTION PAPER DESIGN

7. STUDENT ACTIVITIES

Other than the classroom and laboratory learning, following are the suggested student-related *co-curricular* activities which can be undertaken to accelerate the attainment of the various outcomes in this course: Students should conduct following activities in group and prepare reports of about 5 pages for each activity, also collect/record physical evidences for their (student's) portfolio which will be useful for their placement interviews:

- a. Prepare group activity Report
- b. Prepare Industrial Visit Report
- c. Prepare Guest lecture Report
- d. Undertake micro projects
- e. Undertake MOOC certifications.

8. SPECIAL IMPLEMENTATION/INSTRUCTIONAL STRATEGIES

These are sample strategies, which the teacher can use to accelerate the attainment of the various outcomes in this course:

- a. Microproject:
 - Teachers must brief the students about outcome expected through Microproject, form groups, and allocate micro projects to group of 3-4 within first two weeks.
 - Micro-Projects must be on a problem statement with the aim to achieve not more than three outcomes by combining outcomes from two courses. Assessment will be as per Rubrics (A) done progressively.
 - Students must utilize the allocated slots as per the course for development of Microproject. Faculty must take care that the problem statement to be developed and presented are fair enough for stipulated time duration (12hrs.)
 - Teachers may organize departmental/interdepartmental project exhibition or presentations as per convenience to enhance demonstration/presentation skills.

NOTE: All first year and Second year faculty members prepare combined document regarding detail problem statement of Microproject. Other than this Individual Teaching Faculty may add other problem statements.

- b. MOOCs : Teachers are advised to guide students into undertaking the MOOCs courses offered through various platforms. Students may take up different courses under the guideline of faculty. Faculty may take help of SWOC analysis for deciding the relevance of course allocation. Following are the guidelines, students may follow:-
 - May take technical courses for enhanced knowledge in interested areas.

(An Autonomous Institute of Govt. of Maharashtra)

Scheme: 180 OB

- Students requiring courses on language ability may take-up those courses
- Students interested in Management/Entrepreneurship may opt for relevant courses.
- Students requiring mathematical skills may opt for mathematics courses with relevant topics.
- Faculty must motivate students to acquire certifications. If not faculty may take orals, ensure that proper outcome is being acquired and assign marks in proportion.
- Students must use the timetable slots allotted for course and may utilize extra hours if interested.
- Assess students performance with the help of RUBRICs (B).
- c. Guest Lecture/Industry Visit :
 - Faculty must undertake Expert Lectures and Industry visit planned at start of semester by Department to fulfill gaps/knowledge and relevant skill enhancements.
 - Students must submit Report as per given format (FORMAT-Visit and FORMAT-Guest Lecture)
 - Assessment will be done as per RUBRICs(C/D) as applicable
- d. Group activity :RUBRICs
 - Faculty must assign different group activity to different groups based on their abilities and preferences. Students must complete activity, prepare report and cite acquired affective domain outcome.(Format Group activity)
 - Faculty will guide students regarding the same.

Micro-Project Guidelines

- 1. Micro-project selection should be based on First Semester learnt and Second Semester learning courses.
- 2. Group of 3-4 students can work on micro-project under the guidance of Course teacher. Students can finalise micro-project topics through number of discussions with course teacher .
- 3. Abstract must not be greater than 100 words. Report must not be more than 7-10 pages.
- 4. Micro-project topics across all students must not be repeated.
- 5. Due care must be taken to write reports with grammatically correct statements and in neat and clean handwriting. Statement must not contain shortcups and spelling mistakes.
- **6.** Evaluation of Micro-project should be based on Topic Selection, Problem Definition, Requirement gathering, Development, Presentation, Report writing and Response to the Questions.
- 7. Micro-project Report must include
 - 1. Cover Page
 - 2. Index
 - 3. Abstract
 - 4. Chapters
 - 5. References/Bibliography
- 8. The page size of the Micro-project report should be A4.
- 9. Page Numbering (Centered having format Page No_ of __)
- 10. Paper Size: A- 4 size paper
 - 1. Margins :

Top: 1" (1 inch=2.54cm) Bottom: 1.15" (2.86cm) Left: 1.5" Right: 0.6"

(*):OE/POE (Oral Examination/Practical&Oral Examination mention whichever is applicable)

Legends: L- lecture, T-Tutorial/teacher guided theory practice, P-practical, ESE-End semester examination, PA- Progressive Assessment.

2. RATIONALE

Due to globalization and competition in the industrial and service sectors the selection for the job is based on campus interviews or competitive tests. While selecting candidates a normal practice adopted is to see general confidence, ability to communicate and attitude, in addition to basic technological concepts. The purpose of introducing professional practices is to inculcate soft skills through active learning. Micro-Project , MOOCs courses, Industrial visits, expert lectures and related presentations and/ group discussions on technical topics are planned so that there will be increased ,active participation of students in learning process and hence impart lifelong learning ability.

3. COURSE OUTCOMES (COs)

The theory, practical experiences and relevant Professional skills associated with First and second semesters courses are to be taught and implemented, so that the student demonstrates the following industry oriented COs associated with the above mentioned competency:

- 1. Apply acquired knowledge
- 2. Learn independently and develop life long learning ability.
- 3. Perform SWOT analysis.
- 4. Learning through observations and Interactions.
- 5. Understand and prepare Reports.

4. SUGGESTED PRACTICALS/ EXERCISES

The practicals in this section are PrOs (i.e. sub-components of the COs) to be developed and assessed in the student for the attainment of the competency:

| | Learning Outcome | | | Approxi |
|----------------|--|---|-----------------|--------------------------------|
| Sr. No · | | Practical Exercises (Outcomes in Psychomotor Domain) | Releva nt CO | mate Hours Require d. |
| 1 | a. Application and integration of knowledge from minimum three course outcomes of two courses for development of a project. b. Write reports and state outcomes achieved. c. Work in group d. Present/Demonstrate project | Micro-Project – a) Microproject allocation and development (06-08 hrs.) Faculty must allocate one real life simple problem statement(least complexity) for Microproject which is combination of application of minimum two courses learnt/being learnt during Third and Fourth semesters to a group of 3-4 students. The problem statement must involve simple logic building which can be designed and implemented within 06-08 hours. b) Report Writing : Not more than 7-8 pages (to be prepared simultaneously with development) a. Problem Definition b. Platform and/Hardware Specifications c. Flow charts/diagram related to microproject d. Source Code/Related Procedure for Micro-Project e. Outcome (Technical/Personal) achieved f. Books/References/Websites. c) Microproject Presentations/Demonstrations (04 hrs.) (Preferrably by arranging Project exhibition/ classroom presentations as is applicable) | CO1 | 12 |
| 2 | a. Learn from alternate | MOOCs(Massive open online courses): | CO2 | 10 |
| | sources. b. Enhance self learning ability | Undertake SWAYAM/NPTEL/Spoken Tutorial/Any other Online Courseslearning courses and certificate courses Each individual student can select any relevant online course under the guidance of course teacher as per interest areas. | | |

| 3 | a. Interpersonal skill and | SWOT Analysis : Self SWOT analysis | CO3 | 06 |
|---|----------------------------|---|-----|----|
| | personal skill | Study Habits (Group discussions)Sharing of | | |
| | development. | self -experiences in a group on | | |
| | b. Develop conflict | Note taking, Methods of Learning, | | |
| | resolutionability. | Memory Enhancement, self - Study | | |
| | | Techniques, Techniques for effective Reading | | |
| | | and Writing. | | |
| | | Stress Management(Role play by group) | | |
| | | Stresses in groups, how to control emotions, | | |
| | | Strategies to overcome stress, understanding | | |
| | | importance of good health to avoid stress. | | |
| | | Out of above three SWOT analysis is | | |
| | | compulsory for all students . Half groups | | |
| | | can get involved in group discussions on | | |
| | | study habits and each group leader will | | |
| | | present abstract to all. Half groups will | | |
| | | present role play on stress management. | | |
| | | Groups can be considered for different | | |
| | | activities based on their likings. | | |
| 4 | a. Learning through | Industrial Visit | CO4 | 02 |
| | observations. | Industrial visits must be arranged for fulfilling | | |
| | b. Understanding | the requirement of programme/course | | |
| | professional | outcomes of undertaken courses of first and | | |
| | environment. | second semester and report of the sameshould | | |
| | c. Report writing. | be submitted by the individual student, to form | | |
| | | a part of the term work. | | |
| 5 | a. Understanding | Expert Lecture | CO5 | 02 |
| | industry practices or | Lectures by Professional / Industrial Expert to | | |
| | evolving concepts. | be organized to bridge the gap of learnt/ | | |
| | b. Report writing. | undertaken courses during first and second | | |
| | | semester. Probably the Professional / | | |
| | | Industrial Expert can be organized in the | | |
| | | following areas - | | |
| | | 1. Project presentation tips. | | |
| | | 2. Spoken English. | | |
| | | 3. Personality development. | | |
| | | 4. How to develop positive thinking. | | |
| | | 6. Any topic related to social awareness | | |
| | | 7. Hygiene Awareness | | |
| | | 7. Any other topics. | | |
| | | Total | | 32 |

| Sr.No. | Performance Indicators | Weightage in Marks |

| Π | MOOCs:SWAYAM-NPTEL and Spoken Tutorial Courses | 10 | | | | |
| III | Group Activity | 06 | | | | |
| IV | Industrial Visit | 02 | | | | |
| V | Expert Lecture | 02 | | | | |
| | Total | 32 | | | | |

7. STUDENT ACTIVITIES

Other than the classroom and laboratory learning, following are the suggested student-related *co-curricular* activities which can be undertaken to accelerate the attainment of the various outcomes in this course: Students should conduct following activities in group and prepare reports of about 5 pages for each activity, also collect/record physical evidences for their (student's) portfolio which will be useful for their placement interviews:

- a. Prepare group activity Report
- b. Prepare Industrial Visit Report
- c. Prepare Guest lecture Report
- d. Undertake micro projects
- e. Undertake MOOC certifications.

7. SUGGESTED SPECIAL INSTRUCTIONAL STRATEGIES (if any)

These are sample strategies, which the teacher can use to accelerate the attainment of the various outcomes in this course:

- a. Microproject:
 - Teachers must brief the students about outcome expected through Microproject, form groups, and allocatemicro projects to group of 3-4 within first two weeks.
 - Micro-Projects must be on a problem statement with the aim to achieve not more than three outcomes by combining outcomes from two courses. Assessment will be as per Rubrics (A) done progressively.
 - Students must utilize the allocated slots as per the course for development of Microproject. Faculty must take care that the problem statement to be developed and presented are fair enough for stipulated time duration (12hrs.)
 - Teachers may organize departmental/interdepartmental project exhibition or presentations as per convenience to enhance demonstration/presentation skills.

NOTE: All first year and Second year faculty members prepare combined document regarding detail problem statement of Microproject. Other than this Individual Teaching Faculty may add other problem statements.

- b. MOOCs : Teachers are advised to guide students into undertaking the MOOCs courses offered through various platforms. Students may take up different courses under the guideline of faculty. Faculty may take help of SWOC analysis for deciding the relevance of course allocation.Following are the guidelines, students may follow:-
 - May take technical courses for enhanced knowledge in interested areas.
 - Students requiring courses on language ability may take-up those courses
 - Students interested in Management/Entrepreneurship may opt for relevant courses.
 - Students requiring mathematical skills may opt for mathematics courses with relevant topics.
 - Faculty must motivate students to acquire certifications. If not faculty may take orals , ensure that proper outcome is being acquired and assign marks in proportion.
 - Students must use the timetable slots allotted for course and may utilize extra hours if interested.
 - Assess students performance with the help of RUBRICs (B).
- c. Guest Lecture/Industry Visit :
 - Faculty must undertake Expert Lectures and Industry visit planned at start of semester by Department to fulfill gaps/knowledge and relevant skill enhancements.
 - Students must submit Report as per given format (FORMAT-Visit and FORMAT-Guest Lecture)
 - Assessment will be done as per RUBRICs(C/D) as applicable
- d. Group activity :RUBRICs
 - Faculty must assign different group activity to different groups based on their abilities and preferences. Students must complete activity, prepare report and cite acquired affective domain outcome.(Format Group activity)
 - Faculty will guide students regarding the same.

Micro-Project Guidelines

- 1. Micro-project selection should be based on Third Semester learnt and Fourth Semester learning courses.
- 2. Group of 3-4students can work on micro-project under the guidance of Course teacher. Students can finalise micro-project topics through number of discussions with course teacher.
- 3. Abstract must not be greater than 100 words. Report must not be more than 7-10 pages.
- **4.** Micro-project topics across all students must not be repeated.
- 5. Due care must be taken to write reports with grammatically correct statements and in neat and clean handwriting. Statement must not contain shortcups and spelling mistakes.
- **6.** Evaluation of Micro-project should be based on Topic Selection, Problem Definition, Requirement gathering, Development, Presentation, Report writing and Response to the Questions.
- 7. Micro-project Report must include
 - 1. Cover Page
 - 2. Index
 - 3. Abstract
 - 4. Chapters
 - 5. References/Bibliography
- 8. The page size of the Micro-project report should be A4 .
- 9. Page Numbering (Centered having format Page No_ of __)
- 10. Paper Size: A- 4 size paper
 - 1. Margins :

Top: 1" (1 inch=2.54cm) Bottom: 1.15" (2.86cm) Left: 1.5" Right: 0.6"

- 2. Line Spacing: 1.5 line
- 3. Title of Chapter

Font: Times New Roman (Bold face) Size: 14 point Alignment: Centre

11. Text

Font: Times New Roman Size: 12 point Alignment: Justified (Full Text)

12. Figures and Tables:

- a. Font: Times New Roman (Bold)
- b. Size: 12 point
- c. Alignment: Centered
- d. Figure Caption must be below the figure and centered
- e. Table caption must be above the table and centered

2. RATIONALE

Web pages will always be in the form of HTML. Client-side scripting including faster response times, a more interactive application, and less overhead on the web server. As web applications become larger and more complex, combined with the increasing popularity of mobile applications that run on smart phones and other mobile devices, the need for client-side scripting, JavaScript will continue to grow.

3. COMPETENCY

The aim of this course is to attend following industry identified competency through various teaching learning experiences:

• Build Webpages using JavaScript.

4. COURSE OUTCOMES (COs)

The theory, practical experiences and relevant Technical skills associated with this course are to be taught and implemented, so that the student demonstrates the following industry oriented COs associated with the above mentioned competency:

- 1. Write JavaScript using basic syntactical constructs
- 2. Create forms and Control browser window features through Scripts

- 3. Write and Execute JavaScript for handling cookies and regular expressions for validations
- 4. Create Webpages with Rollovers, Status Bar, Banners and Slideshow.
- 5. Create web page application using Angular JS

5. SUGGESTED PRACTICALS/ EXERCISES

The practicals in this section are PrOs (i.e. sub-components of the COs) to be developed and assessed in the student for the attainment of the competency:

| Sr. No. | Unit No. | Practical Exercises (Learning Outcomes in Psychomotor Domain) | Relevant CO | Approx. Hrs. Required |
|------------|-------------|---|----------------|-----------------------------|
| 1. | 1 | Programs based on decision making statement | CO1 | 02 |
| 2. | | Programs based on looping statement | CO1 | 02 |
| 3. | 2 | Programs based on arrays | CO1 | 02 |
| 4. | | Programs based on functions | CO1, CO2 | 02 |
| 5. | | Programs based on strings | CO1, CO2 | 02 |
| 6. | 3 | Program using Form Objects and form elements | CO1, CO2 | 02 |
| 7. | | Program using Form Events | CO1, CO2 | 02 |
| 8. | | Program using Intrinsic Java Functions | CO1, CO2 | 02 |
| 9. | | Programs for Using and Personalizing cookies | CO4 | 02 |
| 10. | | Programs for placing the Window on the screen. | CO4 | 02 |
| 11. | | Programs for accessing child Window. | CO4 | 02 |
| 12. | 4 | Programs for implementing Rollovers | CO4 | 02 |
| 13. | | Programs for implementing Banners, Slideshow Programs for implementing Status bars and Web Page Protection | CO4 | 02 |
| 14. | | Write a JavaScript program to display the current day and time in the following format. Sample Output : Today is : Tuesday. Current time is : 10 PM : 30 : 38 Write a JavaScript program to get the current date. | CO4 | 02 |

| 15. | 5 | Writing basic application demonstrating Angular JS expressions and directives (Any 2) | CO5 | 02 |
|-----|---|--|-----|----|
| 16. | | Writing Simple application using Angular JS and Forms (Any 2) | CO5 | 02 |
| | | Total | | 32 |

| Sr.No. | Performance Indicators | Weightage in % |
|--------|----------------------------|----------------|
| a. | Coding | 70 |
| b. | Designing | 10 |
| С | Answer to sample Questions | 10 |
| d. | Submit Report in time. | 10 |
| | Total | 100 |

6. MAJOR EQUIPMENT/ INSTRUMENTS REQUIRED

The major equipment with broad specification mentioned here will usher in uniformity in conduct of practical, as well as aid to procure equipment by authorities concerned.

| Sr. No. | Equipment Name with Broad Specifications | Experiment Sr.No. | |
|------------|--|----------------------|--|
| 1. | Any browser | 1 to 16 | |
| 2. | Any word processing IDE | 1 to 16 | |

7. THEORY COMPONENTS

The following topics/subtopics should be taught and assessed in order to develop UOs for achieving the COs to attain the identified competency.

| Unit Outcomes (UOs) | Topics and Sub-topics | | | | |
|---|---|--|--|--|--|
| (in cognitive domain) | | | | | |
| UNIT 1. An Insid | UNIT 1. An Inside Look At JavaScript Programming (Hrs-02) | | | | |
| 1a. Create a JavaScript page | 1.1Getting Down To JavaScript | | | | |
| using various control and | 1.2 Values and Variables | | | | |
| looping structure | 1.3 Operators and Expressions | | | | |
| | 1.4 if Statement | | | | |
| | 1.5 switchcase Statement | | | | |
| | 1.6 Loop Statement | | | | |
| UNIT 2 Arrays ,Functions and String (Hrs- 04) | | | | | |

| Unit Outcomes (UOs) | Topics and Sub-topics |
|--|--|
| (in cognitive domain) Write a JavaScript using array and Function. 2b. Implement various string functions. | 2.1 Array : Declaring, Defining ,Looping The Array, Adding Array Element ,Sorting Array Elements ,Making a New Array from an Existing Array, Combining Array Elements into a String, Changing Elements of the Array. 2. 2 Function: Defining, The Scope of Variables and Arguments, Calling a Function, Function Calling Another Function, Returning Values from a Function. 2.3 String : Joining Strings, Dividing Text, Converting Numbers and Strings, Changing the Case of the Strings, Strings and Unicode: |
| UNIT 3 Forms and | Event Handling, Cookies and Browser Windows (Hrs-04) |
| 3a. Develop JavaScript to handle event 3b. Write JavaScript to handle forms using intrinsic function 3c Manage cookies using JavaScript | 3.1 Building Block of a Form, Responding to Form Events, Form Objects and Elements, Changing Attribute Values Dynamically, Changing Option List Dynamically ,Evaluating Check Box Selections, Manipulating Elements Before the Form, Disabling Elements, Read-Only Elements, Using Intrinsic JavaScript Functions, Changing Labels Dynamically 3.2 Cookie Basics, Creating, Reading, Setting the Expiration Date, Deleting Personalizing and Experience Using a Cookie. 3.3 Giving the New Window Focus, Placing an Window into Position on the Screen ,Changing the Contents of a Window , Closing the Window Scrolling a Web Page ,Opening Multiple Windows at Once, Creating a Web Page in a New Window |
| | s, JavaScript and Frames, Rollovers, Status Bar, Banners, |
| Slideshow 4a. Validate form using regular expressions. 4b.Implement banners slideshow and rollovers to make website come alive | w, Protecting Your Webpage (Hrs- 04) 4.1 Regular Expression: The Language of a Regular Expression, Replace Text, Return the Matched Characters, Using a Regular Expression Invisible Borders 4.2 Calling a Child Windows JavaScript Function, Changing the Content of a Child Window, Changing the Focus of a Child Window, Writing to a Child Window from a JavaScript, Accessing Elements of Another Child Window 4.3 Setting the Stage, Creating a Rollover, Text Rollovers, Multiple Actions for a Rollover, More Efficient Rollovers, Making Magic Using the Status Bar, Banner Advertisements, Creating a Slideshow |
| U | NIT 5 Introduction to Angular JS (Hrs- 02) |
| 5a. Develop a sample web page using Angular JS | 5.1 Introduction of Angular JS, Core features of Angular JS Angular JS as MVC Architecture. 5.2 Agular JS components: directives, expressions, controls, functions, filters |

| Unit Outcomes (UOs) (in cognitive domain) | Topics and Sub-topics | | |
|--|---|--|--|
| | 5.3 Creating and executing basic application using Agular JS Angular JS with tables, Forms | | |

8. SUGGESTED SPECIFICATION TABLE FOR QUESTION PAPER DESIGN

| Unit | Unit Title | Teaching | Distril | oution of | Theory M | larks |

| No. | | Hours | R Level | U Level | A Level | Total Marks |
| Ι | An Inside Look At JavaScript Programming | 02 | | | | |
| II | Arrays ,Functions and String | 04 | | | | |
| III | Forms and Event Handling, Cookies and Browser Windows | 04 | | | | |
| IV | Regular Expressions, JavaScript and Frames, Rollovers, Status Bar, Banners, Slideshow, Protecting Your Webpage | 04 | | | | |
| V | Introduction to Angular | 02 | | | | |
| | Total | 16 | | | | |

8. SUGGESTED STUDENT ACTIVITIES

Other than the classroom and laboratory learning, following are the suggested student-related *co-curricular* activities which can be undertaken to accelerate the attainment of the various outcomes in this course: Students should conduct following activities in group and prepare reports of about 5 pages for each activity, also collect/record physical evidences for their (student's) portfolio which will be useful for their placement interviews:

- a. Prepare journal based on practical performed in laboratory.
- b. Follow Coding Standards.
- c. Undertake micro-projects.
- d. Develop variety of program to improve logical skills.
- e. Develop Application oriented real-world programs.

9. SUGGESTED SPECIAL INSTRUCTIONAL STRATEGIES (if any)

These are sample strategies, which the teacher can use to accelerate the attainment of the various outcomes in this course:

- a. Massive open online courses (*MOOCs*) may be used to teach various topics/sub topics.
- b. About 15-20% of the topics/sub-topics which is relatively simpler or descriptive in nature is to be given to the students for self-directed learning and assess the development of the COs through classroom presentations (see implementation guideline for details).
- c. With respect to item No.8, teachers need to ensure to create opportunities and provisions for *co-curricular activities*.

- d. Guide student(s) in undertaking micro-projects.
- e. Correlate subtopics with power plant system and equipment.
- f. Use proper equivalent analogy to explain different concepts.
- g. Use Flash/Animations to explain various components, operation and
- h. Teacher should ask the students to go through instruction and Technical manuals

10. SUGGESTED MICRO-PROJECTS

MINI PROJECT: Implement mini project using all the client-side scripting concepts studied in the above units.

11. SUGGESTED LEARNING RESOURCES

| S.N. | Title | Author, Publisher, Edition and Year of publication | ISBN Number |
|------|----------------------------------|---|---------------------|

2. RATIONALE

Software has become the key element in the evolution of Computer-based systems and products. Over the past 50 years, software has evolved from a specialized problem solving and information analysis tool to an industry in itself. Software is composed of programs, data and documents.. The intent of software engineering is to provide a framework for building software with higher quality.

Software testing will introduce you to basic of software testing, teaching you not just the fundamentals of teaching skills but also supporting skills necessary to become a successful software tester .You will learn how to immediately find problems in any computer program, how to plan an effective test approach, how to clearly report your finding, and to tell when your software is ready for release.

3. COMPETENCY

The aim of this course is to attend following industry identified competency through various teaching learning experiences:

• Use relevant process model for developing software products and apply different testing techniques on developed software product.

4. COURSE OUTCOMES (COs)

The theory, practical experiences and relevant soft skills associated with this course are to be taught and implemented, so that the student demonstrates the following industry oriented COs associated with the above mentioned competency:

- 1. Select relevant software process model for software development.
- 2. Prepare software requirement specification and use UML Modeling for software design.
- 3. Estimate size and cost of software product.
- 4. Apply various software testing techniques.
- 5. Prepare test plan for an application.
- 6. Identify bugs to create defect report for an application.

5. SUGGESTED PRACTICALS/ EXERCISES

The practical's in this section are PrOs (i.e. sub-components of the COs) to be developed and assessed in the student for the attainment of the competency:

| Sr. No. | Unit No. | Practical Exercises (Outcomes in Psychomotor Domain) | Relevant CO | Approxim ate Hours Required. |
|------------|-------------|---|----------------|------------------------------------|
| 1. | 1 | Develop software project using any process model. | 1 | 04 |
| 2. | 2 | Create Software Requirement Specification for assigned project | 2 | 02 |
| 3. | 2 | Develop DFDs, Use Case and Activity diagram for assigned project. | 2 | 04 |
| 4. | 2 | Develop Class, Sequence and collaboration diagram for assigned project. | 2 | 04 |
| 5. | 2 | Develop State transition, Component and Deployment diagram for assigned project. | 2 | 02 |
| 6. | 3 | Estimate cost for assigned project using any decomposition technique. | 3 | 02 |
| 7. | 5 | Write a program and design test cases for white box testing to following control structures. 1) For Loop 2) Switchcase 3) DoWhile 4) Ifelse | 4 | 02 |
| 8. | 5 | Design test cases for back box testing for assigned project. | 4 | 02 |
| 9. | 5 | Design test cases for any Web Site. | 4 | 02 |
| 10. | 5 | Design test cases for Regression testing on any web page. | 4 | 02 |
| 11. | 6 | Design Test plan for any application | 5 | 02 |
| 12. | 6 | Prepare defect report after executing test cases for any application. | 6 | 02 |
| 13. | 4 | Write test scripts for any web page using Selenium automation tool. | 4 | 02 |
| | | Total Hrs | | 32 |

| Sr.No. | Performance Indicators | Weightage in % |
|--------|---|----------------|
| a. | Installation and configuration of any UML design tool and | 10 |
| | software testing tool. | |
| b. | Designing UML diagrams and writing test cases. | 40 |
| с. | Quality of result displayed. | 30 |
| d. | Answer to sample questions. | 10 |
| e. | Submission of assignment in time. | 10 |
| | Total | 100 |

6. MAJOR EQUIPMENT/ INSTRUMENTS REQUIRED

The major equipment with broad specification mentioned here will usher in uniformity in conduct of practical, as well as aid to procure equipment by authorities concerned.

| Sr.No. | Major Equipment/ Instruments Required | PrO. No. |
|--------|--|---------------------|
| 1 | Hardware: Personal Computer (i3 to i5 preferable ,RAM Minimum 2 GB | |
| 2 | Operating System: Windows 7 / Windows 8 / Windows 10/Linux or Any Other | For All Experiments |
| 3 | Software Tools: Any UML Tool | - or - in 2p |
| 4 | Software Testing Automation Tools: Any Open Source Testing Tool(Selenium) | |

7. THEORY COMPONENTS

The following topics/subtopics should be taught and assessed in order to develop UOs for achieving the COs to attain the identified competency.

| Unit Outcomes (UOs) (in cognitive domain) | Topics and Sub-topics | | | | | |
|---|--|--|--|--|--|--|
| UNIT 1. INTRODUCTION TO SOFTWARE ENGINEERING (Weightage-12, Hrs-08) | | | | | | |
| 1a. Define Software and its characteristics 1b. Identify and Demonstrate need Umbrella Activities 1c. Analyze various process, methods and tools 1d. Choose and apply domain specific life cycle model for software product development. | 1.1 Evolving role, characteristics and applications of software. 1.2 Software Engineering-A Layered Technology, A process framework. 1.3 Process Models- Waterfall model, Incremental Model RAD Model, Prototyping , Spiral Model, Concurrent Development Model, Component based Development, 1.4 Agile Process Models- Extreme Programming, Adaptive Software development, Scrum, Crystal. | | | | | |

| 2a. Define Customer need – | 2.1 Requirement Engineering Tasks-Inception, Elicitation, Elaboration, |
|--|---|
| Requirement and state various | Negotiation, Specification, Validation |
| tasks | 2.2 Eliciting Requirements- Collaborative Requirements Gathering, |
| 2b. Use various requirement gathering | Quality Function Deployment ,User Scenarios ,Elicitation Work |
| techniques | Products |
| 2c. Use & Design use case for | 2.3 Software Requirement Specification- Need of SRS, Template of |
| Requirement Elicitation | SRS |
| 2d. Validate Requirement and Build | 2.4 Design Concepts- Abstraction, Architecture, Patterns, Modularity, |
| Analysis model (SRS) | Information Hiding |
| 2e. Design UML Diagrams for | 2.5 UML Modeling- Data flow diagram, Class diagram, Sequence |
| software projects | diagram, Use case diagram, Activity diagram, State chart diagram, |
| | Component diagram, Deployment diagrams |
| UNIT 3 SOFTWARE PROJECT N | IANAGEMENT, SCHEDULING AND QUALITY ASSURANCE |
| | (Weightage-16, Hrs-08) |
| 3a. Recognize need of Software project | 3.1 The Management Spectrum: The people, The product, The |
| Management. | Process, The project |
| 3b. Apply various techniques for | 3.2 Decomposition Techniques-LOC and FP based estimation, |
| Estimation | COCOMO model |
| 3c. Determine Size using Function- | 3.3Risk Management: Software risk, Risk Identification, |
| Point metric and Cost Estimation using | RMMM(Risk Mitigation, Monitoring and Management) |
| COCOMO model. | 3.4Project Scheduling -Basic principles of scheduling |
| 3d. Design and implement RMMM | 3.5Project Tracking- Timeline chart, Gantt chart |
| Plan | 3.6 Software Quality Assurance-The-ISO 9001 standard ,Six Sigma |
| 3e. Describe steps for Project | for Software Engineering |
| 3f. Scheduling, and tracking | for Software Engineering |
| 3g. Describe Software Quality | |
| Assurance | |
| | ESTING AND AUTOMATION TESTING (Weightage- 10, Hrs- 08) |
| 4a. Identify need of testing in | 4.1 Software Testing-Objectives, Error and bug terminology |
| software development. | 4.2The Fundamental Test Process |
| 4b. Analyze the quality of | 4.3Quality Assurance and Quality Control, Testing, Verification and |
| Software. | Validation. |
| 4c. Discover how to improve | 4.4 Automation Testing : Introduction, Features of test tool, Guideline |
| testing efficiency by automating | for selecting a tool |
| your test. | 4.5 Static and dynamic testing tool, Advantages and Disadvantages of |
| 4d. Test software using automated | using tools, When to use Automated test tools. |
| test tools. | |
| UNIT 5 TYPE | ES OF TESTING (Weightage- 14, Hrs- 08) |
| 5a. Test software using different | 5.1 White box testing -Static testing , dynamic testing |
| testing techniques | 5.2 Black box testing- Requirement based testing, Positive and |
| 5b. Test software for Acceptance | Negative testing, Boundary value analysis, Decision tables, |
| testing. | Equivalence partitioning, User documentation testing. |
| 5c. Test software for System | 5.3 Integration testing- Top-Down and Bottom-Up integration, |
| Testing | 5.4 Acceptance testing-Alpha and Beta Testing, Acceptance testing |
| 5d. Test software using Special | 5.5 System Testing- Performance testing, Stress testing, Recovery |
| Testing techniques. | testing, Compatibility testing, Security testing, Usability testing. |
| | 5.6 Special Tests: Smoke and Sanity testing, Regression testing, GUI |
| | testing, Object oriented application testing, Client-Server testing, |
| | Web based testing. |
| | |

| UNIT 6 TEST MANAGEMEN | NT AND DEFECT MANAGEMENT (Weightage- 14, Hrs- 08) |
|--|---|
| 6a. Prepare test plan for given application. | 6.1 Test Planning-Preparing a test plan, Scope management, Deciding test approach, Setting up criteria for testing, Identifying |
| 6b. Describe Test management | Responsibilities, Staffing, Training needs, Resource requirements, |
| process | Test deliverables, Testing tasks. |
| 6c. Find Defect using different | 6.2 Test Management: Choice of standards, Test infrastructure |
| technique. | management, Test people management , integrating with product |
| 6d. Describe Defect Life cycle | release. |
| | 6.3 Test Process: Base lining a test plan, Test case specification, |
| | Update of Traceability matrix |
| | 6.4 Test Reporting: Recommending product release, Executing test |
| | cases, Collecting and analyzing metrics, Preparing test summary |
| | report. |
| | 6.5 Defect Management-Introduction, Defect classification, Defect |
| | management process. |
| | 6.6 Defect life cycle, Defect template. |

8. SUGGESTED SPECIFICATION TABLE FOR QUESTION PAPER DESIGN

| Unit | Unit Title | Teaching | Distril | oution of | Theory M | heory Marks | |
|------|---|----------|---------|-----------|----------|-------------|--|
| No. | | Hours | R | U | Α | Total | |
| | | | Level | Level | Level | Marks | |
| Ι | Introduction to software engineering | 08 | 2 | 4 | 6 | 12 | |
| II | Requirement, design and modeling engineering | 08 | 4 | 4 | 6 | 14 | |
| III | Software project management ,scheduling and quality assurance | 08 | 4 | 4 | 8 | 16 | |
| IV | Basics of software testing and automation testing | 08 | 2 | 4 | 4 | 10 | |
| V | Types of testing | 08 | 4 | 4 | 6 | 14 | |
| VI | Test and defect management | 08 | 4 | 4 | 6 | 14 | |
| | Total | 48 | 20 | 24 | 36 | 80 | |

9. SUGGESTED STUDENT ACTIVITIES

Other than the classroom and laboratory learning, following are the suggested student-related *co-curricular* activities which can be undertaken to accelerate the attainment of the various outcomes in this course: Students should conduct following activities in group and prepare reports of about 5 pages for each activity, also collect/record physical evidences for their (student's) portfolio which will be useful for their placement interviews:

a. Prepare journals based on practical's performed in laboratory.

10. SUGGESTED SPECIAL INSTRUCTIONAL STRATEGIES (if any)

These are sample strategies, which the teacher can use to accelerate the attainment of the various outcomes in this course:

- a. Massive open online courses (*MOOCs*) may be used to teach various topics/sub topics.
- b. About *15-20% of the topics/sub-topics* which is relatively simpler or descriptive in nature is to be given to the students for *self-directed learning* and assess the development of the COs through classroom presentations (see implementation guideline for details).
- c. With respect to item No.8, teachers need to ensure to create opportunities and provisions for *co-curricular activities*.
- d. Guide student(s) in undertaking micro-projects.
- e. Correlate subtopics with power plant system and equipments.
- f. Use proper equivalent analogy to explain different concepts.
- g. Use Flash/Animations to explain various components, operation and
- h. Teacher should ask the students to go through instruction and Technical manuals

11. SUGGESTED MICRO-PROJECTS

(Only for Class Declaration Courses)

Only one micro-project is planned to be undertaken by a student that needs to be assigned to him/her. In the first four semesters, the micro-project are group-based. However, in the fifth and sixth semesters, it should be preferably be **individually** undertaken to build up the skill and confidence in every student to become problem solver so that s/he contributes to the projects of the industry. In special situations where groups have to be formed for micro-projects, the number of students in the group should **not exceed three.**

The micro-project could be industry application based, internet-based, workshopbased, laboratory-based or field-based. Each micro-project should encompass two or more COs which are in fact, an integration of PrOs, UOs and ADOs. Each student will have to maintain dated work diary consisting of individual contribution in the project work and give a seminar presentation of it before submission. The total duration of the micro-project should not be less than **16** (sixteen) student engagement hours during the course. The student ought to submit micro-project by the end of the semester to develop the industry oriented COs.

A suggestive list of micro-projects is given here. Similar micro-projects could be added by the concerned faculty:

a. Identify the Problem Statements and Prepare SRS for given software.

b. Choose relevant process Model for given software development.

c. Apply testing techniques to test given software.

12. SUGGESTED LEARNING RESOURCES

| S.N | Title | Author, Publisher, Edition and Year of publication | ISBN Number |

2. RATIONALE

This course is aimed at providing the students with conceptual understanding of issues of Computer Networks with respect to Network and above layers of TCP/IP model. It aims at providing in depth knowledge of Network Organization, addressing, Security and role of various protocols in Internetworking Environment.

3. COMPETENCY

The aim of this course is to attend following industry identified competency through various teaching learning experiences:

• Maintain the networking environment .

4. COURSE OUTCOMES (COs)

The theory, practical experiences and relevant soft skills associated with this course are to be taught and implemented, so that the student demonstrates the following industry oriented COs associated with the above mentioned competency:

- 1. Learn Setting up of a network.
- 2. Learn the use of Internet Protocol.
- 3. Configure Static as well as Dynamic IP Addresses
- 4. Learn how World Wide Web is organized
- 5. Compare the different interconnecting systems throughout the world.
- 6. Understand various security and protection issues in the Networking Environment.

5. SUGGESTED PRACTICALS/ EXERCISES

The practical's in this section are PrOs (i.e. sub-components of the COs) to be developed and assessed in the student for the attainment of the competency:

| Sr. No. | Unit No. | Practical Exercises (Outcomes in Psychomotor Domain) | Relevant CO | Approximate Hours Required. |
|------------|-------------|--|----------------|-----------------------------------|
| 1. | | Study of Router, Gateway and switches with its | 1 | 02 |
| | 1 | specification | | |
| 2. | | Study of available ISP's in India | 1 | 02 |
| 3. | | Design Network using the sub networking | 2 | 04 |
| 4. | - 8 | | 3 | 04 |
| | | address using DHCP | | |
| 5. | 4 | Configure FTP server | 1 | 04 |
| 6. | | Configure Telnet | 1 | 02 |
| 7. | 3 | Study and Configure POP3, IMAP and SMTP protocol | 4,5 | 04 |
| 8. | 5 | Study Network monitoring tools(IDS) | 6 | 04 |
| 9. | 5 | Study of RIP Simulator | 6 | 02 |
| 10. | 6 | Write a program to design symmetric and asymmetric key cryptography. | 5 | 04 |
| | | Total Hrs. | | 32 |

| S.No. | Performance Indicators | weightage in % |
|-------|---|----------------|
| a. | Learn Setting up of a network. | 20 |
| b. | Learn the use of Internet Protocol. | 20 |
| с. | Configure Static as well as Dynamic IP Addresses | 10 |
| | Learn how World Wide Web is organized | 10 |
| d. | Compare the different interconnecting systems throughout the world. | 20 |
| e. | Understand various security and protection issues in the Networking Environment | 10 |
| f. | Submission of report in time | 10 |
| | Total | 100 |

6. MAJOR EQUIPMENT/ INSTRUMENTS REQUIRED

The major equipment with broad specification mentioned here will usher in uniformity in conduct of practical, as well as aid to procure equipment by authorities concerned.

| Sr.No. | Major Equipment/ Instruments Required | PrO. No. |
|--------|---------------------------------------|----------|
| 1 | Computers | ALL |
| 2 | Networking (Internet) | ALL |

7. THEORY COMPONENTS

The following topics/subtopics should be taught and assessed in order to develop UOs for achieving the COs to attain the identified competency.

| Unit Outcomes (UOs) | Topics and Sub-topics | | | | |
|--|--|--|--|--|--|
| (in cognitive domain) | | | | | |
| UNIT 1. Ne | twork Layer I (Weightage-14 , Hrs 12) | | | | |
| 1a. Define Logical addressesdevelopment1b. Explain NAT and its use | 1.1 Logical Addressing: IPv4 Addresses- Address space, Notations, classful addressing, classless addressing, Network address translation(NAT), IPv6 Addresses- Structure, Address space | | | | |
| 1c. Distinguish between IPV4 and IPV61d. Choose between RARP, BOOTP and DHCP | 1.2 Internetworking: Need for Network Layer, Internet as a Datagram network, Internet as a Connectionless Network, IPv4- Datagram, Fragmentation, Checksum, Options IPv6- Advantages, Packet format, Extension headers, Transition from IPv4 to IPv6- Dual Stack, Dual Stack, Tunneling, Header translation | | | | |
| 1.3 Address Mapping: Mapping Logical to Physical Addresses-ARP, Mapping Physical to Logical Addresse – RARP,BOOTP and DHCP | | | | | |
| UNIT 2. Net | work Layer II (Weightage-14, Hrs 12) | | | | |
| 2a. List error reporting and query messages.2. 1 ICMP-: Types of messages, Message format, E reporting,2b. compare direct and indirect delivery.Query2c. Explain use of routing table.2.2 Delivery: Direct vs Indirect Delivery2d. compare multicasting and broadcasting.2.4 Routing Protocols: Optimization, Intra and Inter Routing, Distance Vector Routing, Link State Routi Vector Routing25. List error reporting and query messages.2.1 ICMP-: Types of messages, Message format, E reporting, Query2b. compare direct and indirect delivery.2.2 Delivery: Direct vs Indirect Delivery2.3 Forwarding- forwarding Techniques, Forwarding Process, Routing Table, Unicast2.4 Routing Protocols: Optimization, Intra and Inter Routing, Distance Vector Routing, Link State Routi Vector Routing2.5 Introduction to multicasting and broadcasting. | | | | | |
| UNIT 3 Tra | UNIT 3 Transport Layer (Weightage-12, Hrs 08) | | | | |

| 3a. Explain process to process delivery 3b. Compare Multiplexing and demultiplexing 3c. Compare Connection oriented and Connectionless services 3d. Discover TCP and UDP protocols 3e. Categorize network traffic 3f. Prove best congestion control method 3g. Explain techniques to improve QOS | 3.1 Process to Process : Delivery Client/Server Paradigm, Multiplexing and demultiplexing, Connectionless vs. Connection-Oriented Service, Reliable vs. Unreliable. Three Protocols, User Datagram Protocol(UDP)- Well Known Ports for UDP, User Datagram, Checksum, UDP Operation, Use of UDP, TCP- TCP Services, TCP Features, Segment, A TCP Connection, Flow Control, Error Control, Congestion Control 3.2 Data Traffic: Traffic Descriptor, Traffic profiles 3.3 Congestion: Network Performance, Congestion Control- Open Loop Congestion Control, Closed Loop Congestion Control, Examples- Congestion Control in TCP and Frame Relay |
|--|--|
| | 3.4 Quality of Service: Flow Characteristics, Flow Classes, Techniques to Improve QoS- Scheduling, Traffic shaping, Resource Reservation, Admission Control. |
| UNIT 4 Application Lay | ver I: DOMAIN NAME SYSTEM(Weightage-14, Hrs 12) |
| 4a. Define name space in WWW. 4b. Recall working of internet 4c. Demonstrate caching work in DNS 4d. Apply remote logging in troubleshooting networking problems 4e. Design Email application 4f. Compare POP and IMAP | 4.1 Name Space: Flat Name Space, Hierarchical Name Space, Domain Name Space- Label, Domain Name, Domain, Distribution of Name Space- Hierarchy of Name Servers, Zone, Root Server, Primary and Secondary Servers 4.2 DNS in the Internet: Generic Domains, Country Domains, Inverse Domain, Resolution- Resolver, Mapping names to Addresses, Mapping Addresses to Names, Recursive resolution, Iterative Resolution, Caching, |
| 4g. Elaborate FTP protocol. | 4.3 DNS Messages: Header, Types of Records- Question Record, Resource Record, Registrars, Dynamic, Domain Name Systems(DDNS), Encapsulation |
| | 4.4 REMOTE LOGGING: Remote logging, Telnet |
| | 4.5 ELECTRONIC MAIL AND FILE TRANSFER: Electronic Mail- Architecture, User Agent, Message Transfer Agent: SMTP, Message Access Agent: POP and IMAP, Web-based Mail |
| | 4.6 File Transfer-File Transfer Protocol(FTP), Anonymous FTP |
| UNIT 5 Application I | ayer II:WWW AND HTTP (Weightage- 12 , Hrs 08) |

| 5a. Illustrate how cookies work 5b. Differentiate between Static Documents and Active Documents. 5c. Explain Proxy Server 5d. Demonstrate how 3 | Resource Loc 5.2 Web Doc HTTP- HTTP | ture: Client(Browser), Server, Uniform ocator, Cookies cuments: Static Documents, Active Documents, P Transaction, Persistent vs. No persistent Proxy Server | | | |
|--|---|---|--|--|--|
| Network Management is done. | 5.3 Network Management System: Configuration Management, Fault Management, Performance Management, Security and Accounting Management, | | | | |
| UNIT 6 Cryptography ar | nd Security in | the Internet (Weightage- 14, Hrs 12) | | | |
| 6a. Illustrate the importance of security 6bDefine cryptography 6c. Explain security services 6d. Justify the use of proxy firewall. | | 6.1 Introduction to Cryptography: Definitions, Categories, Symmetric Key Cryptography- Traditional Ciphers, Simple Modern Ciphers, Asymmetric –Key Cryptography- RSA, Diffie-Hellman. 6.2 Security Services: Message confidentiality, Message Integrity, Message Authentication, Message Nonrepudiation, Entity Authentication. IPSecurity(IPSec)- Two modes, Two Security protocols, Security Association 6.3 PGP-Security Parameters, Services, A Scenario, PGP Algorithms, Key Rings, PGP Certificates Firewalls- Packet filter firewall, Proxy firewall. | | | |

9. SUGGESTED STUDENT ACTIVITIES

Other than the classroom and laboratory learning, following are the suggested student-related *co-curricular* activities which can be undertaken to accelerate the attainment of the various outcomes in this course: Students should conduct following activities in group and prepare reports of about 5 pages for each activity, also collect/record physical evidences for their (student's) portfolio which will be useful for their placement interviews:

- a. Prepare journals based on practical performed in laboratory.
- b. Analysis of real time networking laboratories and organizations (cyber café)

10. SUGGESTED SPECIAL INSTRUCTIONAL STRATEGIES (if any)

These are sample strategies, which the teacher can use to accelerate the attainment of the various outcomes in this course:

- a. Massive open online courses (*MOOCs*) may be used to teach various topics/sub topics.
- b. About *15-20% of the topics/sub-topics* which is relatively simpler or descriptive in nature is to be given to the students for *self-directed learning* and assess the development of the COs through classroom presentations (see implementation guideline for details).
- c. With respect to item No.8, teachers need to ensure to create opportunities and provisions for *co-curricular activities*.
- d. Use proper equivalent analogy to explain different concepts. Use Flash/Animations to explain various components, operation and
- e. Teacher should ask the students to go through instruction and Technical manuals

11. SUGGESTED MICRO-PROJECTS NOT APPLICABLE

2. RATIONALE

This course introduces students to intermediate and advanced features of the Java programming language. Student will know how to implement graphical user interfaces using Java components. In the Era of Web technology it is essential for every diploma Engineer to have knowledge of Internet programming. This course covers advanced features of JAVA.

3. COMPETENCY

The aim of this course is to attend following industry identified competency through various teaching learning experiences:

• Develop standalone Applications using advanced concepts of Java.

4. COURSE OUTCOMES (COs)

The theory, practical experiences and relevant soft skills associated with this course are to be taught and implemented, so that the student demonstrates the following industry oriented COs associated with the above mentioned competency:

- 1. Develop GUI applications using Abstract Windowing Toolkit (AWT) and event handling.
- 2. Create GUI applications using Swing.
- 3. Develop client/server applications using TCP/IP and UDPsocket programming.
- 4. Implement Java programs using databases with Java Data Base Connectivity (JDBC) as interface.
- 5. Develop applications for Remote Method Invocation (RMI).
- 6. Implement Java programs using Servlets.

5. SUGGESTED PRACTICALS/ EXERCISES

The practical's in this section are PrOs (i.e. sub-components of the COs) to be developed and assessed in the student for the attainment of the competency:

| Sr. No. | Unit No. | Practical Exercises (Outcomes in Psychomotor Domain) | Relevant CO | Approximate Hours Required. |
|------------|-------------|---|-------------|-----------------------------------|
| 1. | | Program to design a form using various controls. | CO1 | 02 |
| 2. | | Program to design a form using different Layouts manager. | | 01 |
| 3. | 1 | Program to display any string using available Font and Font metrics class and their methods. | | 02 |
| 4. | | Program to create a menu bar with various menu items and sub menu items. Also create a checkable menu item. On clicking a menu Item display a suitable Dialog box. | | 02 |
| 5. | | Program to design a form using basic swing components. | CO1,CO2 | 02 |
| 6. | 2 | Program to demonstrate the use of tabbed panes and scroll panes in Swing . | | 02 |
| 7. | | Program to map Directory tree and Table. | | 02 |
| 8. | | Program to retrieve hostname using methods in InetAddress class. | CO3 | 02 |
| 9. | 3 | Program to demonstrate use of URL and URL Connection class for communication. | | 02 |
| 10. | | Program that demonstrates TCP/IP and UDP based communication between client and server. | | 02 |
| 11. | A | An Application program to make connectivity with database using JDBC API. | CO4 | 01 |
| 12. | 4 | Application programs to send queries through JDBC bridge & handle result. | | 02 |
| 13. | 5 | Create a Client/Server application using RMI. | CO5 | 02 |

| 14. | | Program to demonstrate the use of HttpServlet as a parameterized Servlet. | CO6 | 02 |
|-----|---|---|-----|----|
| 15. | 6 | Program to send username and password using HTML forms and authenticate the user using Servlet. | | 02 |
| 16. | | Program to create session using HttpSession class. | | 02 |
| 17. | | Program to implement Session tracking using Cookies. | | 02 |
| | | Total Hrs | | 32 |

| Sr.No. | Sr.No. Performance Indicators | | |
|--------|--|----|--|
| a. | Correctness of Program | 40 | |
| b. | Debugging ability | 20 | |
| с | Quality of input and output displayed (messaging and formatting) | 10 | |
| d. | Preparing assignments (write-ups, program and output). | 20 | |
| e. | e. Submit assignment on time. | | |
| | Total | | |

6. MAJOR EQUIPMENT/ INSTRUMENTS REQUIRED

The major equipment with broad specification mentioned here will usher in uniformity in conduct of practical's, as well as aid to procure equipment by authorities concerned.

| Sr. No. | Equipment Name with Broad Specifications | Experiment Sr.No. |
|------------|--|----------------------|
| 1. | Computer System with operating System & any latest JDK version to execute "Java" programs, | 1 to 17 |
| 2. | Notepad | 1 to 17 |
| 3. | Databases like Oracle, Mysql, Ms-access or any other | 11 to 12 |
| 4. | Apache Tomcat server version 7 or above web server | 14 to 17 |

7. THEORY COMPONENTS

The following topics/subtopics should be taught and assessed in order to develop UOs for achieving the COs to attain the identified competency.

| Unit Outcomes (UOs) (in cognitive domain) | Topics and Sub-topics |
|--|---|
| | Section - I |
| UNIT 1. Abstract W | /indowing Toolkit (AWT)(Weightage-20, Hrs-12) |
| 1a. Enlist various AWT | 1.1 Introduction to AWT, AWT classes, Window |
| components. | fundamentals, working with frame Windows, Creating a |
| 1b. Describe Event Delegation | frame Window in an Applet, Creating windowed program. |
| Model. | 1.2 Display information within a window |
| 1c. Describe various handling | 1.3 Control Fundamentals, Labels, Using Buttons, Applying |
| events by extending AWT | Check Boxes, Checkbox Group, Choice Controls, Using |
| 1d. Design a form containing | Lists, managing scroll Bars, Using a Text Field, Using a |

| various AWT components and apply event handling. UNIT 2 Sy | Text Area. 1.4 Understanding Layout Managers, Menu Bars and Menus, Dialog Boxes, File Dialog. 1.5 The delegation event model, Event classes, Sources of Events, Event Listener Interfaces. 1.6 Handling events by Extending AWT Components, Exploring the Controls, Menus, and Layout manager. 1.7 Adapter classes, Inner classes. wing Component(Weightage-10, Hrs- 06) | | | | |
|---|---|--|--|--|--|
| | | | | | |
| 2a. Differentiate between AWT and Swing . 2b. Use swing components to Develop Graphical user interface (GUI) programs. 2c. Develop Graphical user interface (GUI) programs using advanced swing components. | 2.1 Introduction to Swing: Swing features, difference between AWT and Swing. 2.2 Swing Components: Japplet, Icons and JLabels ,JText Fields, JButtons. JCombo Boxes, JCheckboxes, JRadio Buttons. 2.3 Advanced Swing Components: Tabbed Panes, Scroll Panes, Trees, Tables, Progress bars, tool tips. | | | | |
| UNIT 3 Ne | tworking Basics (Weightage- 12, Hrs-06) | | | | |
| 3a. Define socket. 3b. Compare various sockets. 3c. Write a java programs for client server communication using sockets. 3d. Differentiate between TCP/IP and UDP. | 3.1 Socket overview, client/server, reserved sockets, proxy servers, Internet addressing. 3.2 Inetaddress, Factory methods, instance method TCP/IP Client Sockets. 3.3 What is URL Format? URL connection, TCI/IP Server Sockets. 3.4 Datagrams: Datagram packets Datagram server & client. | | | | |
| | Section - II | | | | |
| UNIT 4 Java Da | tabase Connectivity (Weightage- 14, Hrs- 08) | | | | |
| 4a. Describe the Basics of JDBC 4b. Develop a program for JDBC connectivity. 4c. Develop program to establish connectivity with the specified database. | 4.1 Introduction to JDBC, ODBC 4.2 JDBC architecture: Two tier and Three tier models 4.3 Types of JDBC drivers. 4.4 Driver Interfaces and Driver manger Class: Connection Interface and Statement Interface, Prepared statement Interface, Result Set Interface. 4.5 A JDBC Database Example | | | | |
| UNIT 5 Remote | UNIT 5 Remote Method Invocation (Weightage- 10, Hrs-06) | | | | |
| 5a. Compare Distributed and Non distributed Java Programs. 5b. Draw RMI Architecture. 5c. Define stubs and skeletons. | 5.1 Introduction to Distributed Computing with RMI : Goals, Comparison of Distributed and Non distributed Java Programs 5.2 Java RMI Architecture and Interfaces. 5.3 Naming Remote Objects, Using RMI, Interfaces, Implementation, Stubs and Skeletons, Host Server, Client. | | | | |

| | 5.4 Running RMI System, Parameters in RMI, Remote Object Parameters. |
|---|--|
| UNIT | 6 Servlets (Weightage- 14, Hrs-10) |
| 6a. Explain Function of the given method of Servlet life cycle. 6b. Use relevant Generic servlet to develop given web based application. 6c. Use relevant HTTP servlet to develop specified web based application. 6d. Develop servlet for cookies | 6.1 The Life cycle of servlet 6.2 Creating simple Servlet: The Servlet API, javax.servlet Package, Servlet Interface, Servlet Config Interface, ServletContex Interface, Servlet Request Interface, Servlet response Interface, Generic Servlet class 6.3 The java. Servlet.httpPackage: HttpServlet Request Interface, Http Servlet Response Interface, Http Session Interface, Cookie class, Http Servlet class, Http Session Event class, Http Session binding Event class. 6.4 Handling HTTP Requests and Responses Handling HTTP |
| and session tracking to implement the given problem. | GET Request Handling HTTP POST Requests. 6.5 Cookies and session Tracking. |

8. SUGGESTED SPECIFICATION TABLE FOR QUESTION PAPER DESIGN

| Uni | Unit Title | Teaching | Distribution of Theory Marks | | | |
|-----|---------------------------------------|----------|-------------------------------------|-------|-------|-------|
| t | | Hours | R | U | Α | Total |
| No. | | | Level | Level | Level | Marks |
| Ι | Abstract Windowing Toolkit(AWT) | 12 | 06 | 06 | 08 | 20 |
| II | Swing Component | 06 | 02 | 02 | 06 | 10 |
| III | Networking Basics | 06 | 04 | 02 | 06 | 12 |
| IV | Java Database Connectivity (JDBC) | 08 | 04 | 04 | 06 | 14 |
| V | Remote Method Invocation & JAVA Beans | 06 | 04 | 02 | 04 | 10 |
| VI | Servlets | 10 | 04 | 04 | 06 | 14 |
| | Total | 48 | 24 | 20 | 36 | 80 |

9. SUGGESTED STUDENT ACTIVITIES

Other than the classroom and laboratory learning, following are the suggested student-related *co-curricular* activities which can be undertaken to accelerate the attainment of the various outcomes in this course: Students should conduct following activities in group and prepare reports of about 5 pages for each activity, also collect/record physical evidences for their (student's) portfolio which will be useful for their placement interviews:

- a. Prepare journal based on practical performed in laboratory.
- b. Follow Coding Standards.
- c. Give seminar on relevant topic
- d. Undertake micro-projects.

- e. Develop variety of program to improve logical skills.
- f. Develop Application oriented real world programs.

10. SUGGESTED SPECIAL INSTRUCTIONAL STRATEGIES (if any)

These are sample strategies, which the teacher can use to accelerate the attainment of the various outcomes in this course:

- a. Massive open online courses (*MOOCs*) may be used to teach various topics/sub topics.
- b. About *15-20% of the topics/sub-topics* which is relatively simpler or descriptive in nature is to be given to the students for *self-directed learning* and assess the development of the COs through classroom presentations (see implementation guideline for details).
- c. With respect to item No.8, teachers need to ensure to create opportunities and provisions for *co-curricular activities*.
- d. Guide student(s) in undertaking micro-projects.
- e. Correlate subtopics with major topics and concepts.
- f. Use proper equivalent analogy to explain different concepts.
- g. Use Flash/Animations to explain various components and operation.
- h. Teacher should ask the students to go through instruction and Technical manuals.

11. SUGGESTED MICRO-PROJECTS

MINI PROJECT: Implement mini project using all the Java concepts studied in the above units.

(Only for Class Declaration Courses)

Only one micro-project is planned to be undertaken by a student that needs to be assigned to him/her. In the first four semesters, the micro-projects are group-based. However, in the fifth and sixth semesters, it should be preferably be **individually** undertaken to build up the skill and confidence in every student to become problem solver so that she/he contributes to the projects of the industry. In special situations where groups have to be formed for micro-projects, the number of students in the group should **not exceed three.**

The micro-project could be industry application based, internet-based, workshopbased, laboratory-based or field-based. Each micro-project should encompass two or more COs which are in fact, an integration of PrOs, UOs and ADOs. Each student will have to maintain dated work diary consisting of individual contribution in the project work and give a seminar presentation of it before submission. The total duration of the micro-project should not be less than **16** (sixteen) student engagement hours during the course. The student ought to submit micro-project by the end of the semester to develop the industry oriented COs.

A suggestive list of micro-projects is given here. Similar micro-projects could be added by the concerned faculty:

- a. Library Management system
- b. Hospital Management System
- c. Medical Store Stock Management System
- d. Online Railway Reservation System

2. RATIONALE

In today's Digital Era, due to various threats, designing security in organization is an important consideration. It is essential to understand basic security principles, various threats to security and techniques to address these threats. The student will be able to recognize potential threats to Computer Security and also able to implement various computer security policies. This course will introduce basic cryptographic techniques, fundamentals of computer/network security, Biometrics, Public Key Infrastructure. It focuses on concepts and methods associated with planning managing and auditing security at all levels including networks.

3. COMPETENCY

The aim of this course is to help the student to attain the following industry identified competency through various teaching learning experiences:

• Maintain system and network security of organization.

4. COURSE OUTCOMES (COs)

The theory, practical experiences and relevant soft skills associated with this course are to be taught and implemented, so that the student demonstrates the following industry oriented COs associated with the above mentioned competency:

1. Know the basics of Computer Security and identify various software threats and attacks on operating system

2. Adopt security measures for security of vital data and identify role of people in security.

- 3. Apply cryptographic algorithms to maintain Computer Security.
- 4. Know the procedure to obtain digital certificate and PKI.
- 5. Apply various Security mechanisms to provide security of network and system.

5. SUGGESTED PRACTICALS/ EXERCISES

The practicals in this section are PrOs (i.e. sub-components of the COs) to be developed and assessed in the student for the attainment of the competency:

| Sr. No. | Unit No. | Practical Exercises (Outcomes in Psychomotor Domain) | Relevant CO | Approxim ate Hours Required. |
|------------|-------------|--|----------------|------------------------------------|
| 1. | 1 | Study of IT Act and Cyber Laws | CO1 | 02 |
| 2. | 2 | Install and configure Antivirus software on system (any). | CO2 | 02 |
| 3. | | Practice use of data recovery tools | CO2 | 04 |
| 4. | | Write a program to implement any Substitution/Transposition Technique. | CO3 | 04 |
| 5. | 3 | Install any Cryptographic tool(For. Eg. Cryptool Software) | CO3 | 02 |
| 6. | | Perform various Encryption/Decryption techniques using Cryptographic Tool. | CO3 | 04 |
| 7. | 4 | Install and Configure firewall settings on any operating system | CO4 | 04 |
| 8. | 4 | Create and verify Digital Certificate using tool (e.g. Cryptool) | CO4 | 04 |
| 9. | 5 | Trace the origin of Email using any tool(e.g. emailTrackerPro) | CO5 | 04 |
| 10. | | Trace the path of web site using Tracert Utility | CO5 | 02 |
| | | Total Hrs | | 32 |

| S.No. | Performance Indicators | Weightage in % |
|-------|--|----------------|
| a. | Correctness of the flow of procedure. | 30 |
| b. | Application of basic security design principle and techniques to | 20 |
| | address threats. | |
| с. | Use of various security tools and utilities. | 10 |
| d. | Quality of input and output displayed (messaging and formatting) | 10 |
| e. | Answer to sample questions | 20 |
| f. | Submit report in time | 10 |

| S.No. | Performance Indicators | Weightage in % |
|-------|------------------------|----------------|
| | Total 100 | |

6. MAJOR EQUIPMENT/ INSTRUMENTSREQUIRED

The major equipment with broad specification mentioned here will usher in uniformity in conduct of practical, as well as aid to procure equipment by authorities concerned.

| Sr.No. | Major Equipment/ Instruments Required | PrO. No. |
|--------|--|----------|
| 1 | Any Anti-Virus Software | 2 |
| 2 | Cryptographic Tool (For. E.g. Cryptool software) | 5,6,7 |
| 3 | Email Tracing Utility (For eg. Email TrakerPro) | 8 |

7. THEORY COMPONENTS

The following topics/subtopicsshould betaught and assessed in order to develop UOs for achieving the COs to attain the identified competency.

| Unit Outcomes (UOs) (in cognitive domain) | Topics and Sub-topics |
|--|---|
| | ction to computer security (Weightage -16, Hrs-12) |
| 1a. Explain the importance of | 1.1 Foundations of Computer Security : |
| given pillars of computer | Definition and Need of computer security, Security basics: |
| security. | Confidentiality, Integrity, Availability, Accountability, Non-repudiation, Reliability, Authentication. |
| 1b. Explain the characteristics | 1.2 Risk and Threat Analysis: |
| of given type of threat. | Assets, Vulnerability, Threats, Risks, Counter measures. |
| | 1.3 Threat to Security: |
| 1c.Explain types of attacks | Viruses, Phases of Viruses, Types of Virus, Dealing with |
| related with security. | Viruses, Worms, Trojan horse, Intruders, Insiders, Ransomware. |
| | 1.4 Type of attacks: |
| | Active and Passive attacks, Denial of service, DDOS, |
| | backdoors and trapdoors, sniffing, phishing, spoofing, man in |
| | the middle, replay, TCP/IP Hacking, encryption attacks. Steps |
| | in Attacks. |
| | |
| | |

| Unit Outcomes (UOs) | Topics and Sub-topics |
|---|---|
| (in cognitive domain) | 2.1 Identification and Authority - form |
| 2a. Explain how to construct good/strong password) | 2.1 Identification and Authentication: User name & Password, Guessing password, |
| good/strong password) | User name & Password, Guessing password, Password attacks-Piggybacking, Shoulder surfing, Dumpster |
| 2b. Explain the given method | diving |
| of Biometric. | 2.2 Biometrics: |
| of Biometric. | finger prints, hand prints, Retina, patterns, voice |
| 2c. Explain Authentication | patterns, signature and writing patterns, keystrokes. |
| and Authorization with | 2.3 Access controls: |
| example. | Definition, Authentication Mechanism, principle |
| example. | Authentication, Authorization, Audit, Policies: DAC, MAC, |
| 2d. Describe the features of | RBAC |
| given access control policy. | 2.4 Social Engineering. |
| given access condor poney. | 2.1 Social Englisoring, |
| | |
| | |
| UNIT 3. | Cryptography (Weightage- 20, Hrs- 12) |
| 3a. Define terms related to | 3.1 Introduction: |
| cryptography. | Plain Text and Cipher Text, Cryptography, |
| cryptography. | Cryptanalysis, Cryptology, Encryption, Decryption. |
| 3b. Encrypt/Decrypt the | 3.2 Substitution techniques : |
| given text using different | Caesar's cipher, mono alphabetic, poly alphabetic, Vigenere |
| substitution/transposition | cipher |
| techniques. | 3.3 Transposition techniques: |
| 1 | Rail fence technique, simple columnar, Vernam Cipher (One- |
| 3c. Describe various | Time Pad) |
| encryption algorithms | 3.4 Steganography; |
| | Procedure, Hashing: Definition, Hashing Algorithms: MD-5, |
| 3d. Explain Hashing with | SHA |
| properties. | 3.5 Symmetric and Asymmetric cryptography: |
| | Introduction to Symmetric encryption, DES (Data encryption |
| | Standard) algorithm, Asymmetric key cryptography: Digital |
| | Signature |
| | to Voy Infunction (W-1-14 14 H - 00) |
| | lic Key Infrastructure (Weightage-14, Hrs-08) |
| 4a. Explain working of PKI. | 4.1 Public key infrastructures: |
| 1 Describe Dublie Koy | basics, digital certificates, certificate authorities, registration authorities |
| 4b. Describe Public Key Infrastructure | 4.2 Steps for obtaining a digital certificate |
| mnasuuciule | 4.2 Steps for obtaining a digital certificate 4.3 Trust and certificate verification |
| 4c. Describe steps for | 4.4 Digital certificates: |
| obtaining digital certificate | certificate attributes, certificate extensions |
| setuning argitur contineuto | 4.5 Certificate life cycles: |
| 4d. Explain digital certificate | registration & generations, renewal, revocation, CRL |
| life cycle | distribution, suspension, key destruction |
| | 4.6 Centralized and decentralized infrastructure |
| | |

| Unit Outcomes (UOs) (in cognitive domain) | Topics and Sub-topics |
|--|--|
| UNIT 5. System Se | ecurity & Network Security (Weightage-16, Hrs-08) |
| 5a. Explain need of firewalls. | 5.1 Firewall : |
| - | Need of firewall, types of firewall- packet filters, application |
| 5b. Explain Intrusion | gateways, circuit gateways |
| Detection system. | 5.2 Kerberos. |
| | 5.3 Intrusion Detection: |
| 5c. Classify IDS techniques. | Network-Based IDS, Host-Based IDS |
| | 5.4 Honeypots. |
| 5d. Explain different ways to | 5.6 Operating system security: |
| implement IP Security | Operating system updates : hot fix, patch, service pack |
| - | 5.7 IP security: |
| 5e. Explain protocols related | overview, Protocols- AH, ESP, Modes- transport & Tunnel |

2. RATIONALE

The major objectives of this course are to provide a strong formal foundation in Database Concepts, technology and practice to the students to enhance them into well informed application developers. After learning this subject, the students will be able to understand the designing of RDBMS and can use any RDBMS package as a backend for developing database applications.

3. COMPETENCY

The aim of this course is to attend following industry identified competency through various teaching learning experiences:

• Apply database management concepts using SQL and PLSQL.

4. COURSE OUTCOMES (COs)

The theory, practical experiences and relevant soft skills associated with this course are to be taught and implemented, so that the student demonstrates the following industry oriented COs associated with the above mentioned competency:

- 1. Design database schema.
- 2. Normalize given database.
- 3. Draw an Entity Relationship diagram.
- 4. Create and process database for a given case study using relational database management engine.
- 5. Create index, sequence, and views in SQL for tuning the performance in case of data retrieval.
- 6. Write and execute PL/SQL procedures using triggers, cursors.

5. SUGGESTED PRACTICALS/ EXERCISES

The practicals in this section are PrOs (i.e. sub-components of the COs) to be developed and assessed in the student for the attainment of the competency:

| Sr. No. | Unit No. | Practical Exercises (Outcomes in Psychomotor Domain) | Relevant CO | Approxim ate Hours Required. |
|------------|-------------|--|----------------|------------------------------------|
| 1. | 2 | Create and update relation using DDL, DML, DCL and TCL commands. | 4 | 2 |
| 2. | 2 | Applying Constraints on relation. | 4 | 2 |
| 3. | 2 | Draw an ER diagram for given database. | 2 | 4 |
| 4. | 3 | Write Queries using various types of operators like (Set, Relational, Arithmetic and Logical) | 4 | 2 |
| 5. | 3 | Write Queries using various Functions like (Date, Time, String, and Aggregate). | 4 | 2 |
| 6. | 3 | Write Queries using different types of clauses. | 4 | 2 |
| 7. | 3 | Write Queries using different types of Joins. | 4 | 2 |
| 8. | 4 | Create, update and alter View, Sequence and Index. | 5 | 2 |
| 9. | 3 | Design and Develop MongoDB queries using basic operations. | 4 | 2 |
| 10. | 5 | Write the PL/SQL Program using different Control structures. | 6 | 2 |
| 11. | 5 | Programs based on Exceptions handling.(Predefined and user defined exceptions) | 6 | 2 |
| 12. | 5 | Write a program to implement cursors. | 6 | 2 |
| 13. | 6 | Write program to implement stored Procedure and Functions. | 6 | 2 |
| 14. | 6 | Write program for creating Various types Triggers. | | 2 |
| 15. | 6 | Creating and deleting users and assign privileges to users. | 4 | 2 |
| | | Total Hrs | | 32 |

| S.No. | Performance Indicators | Weightage in % |
|-------|---|----------------|
| a. | Installation and configuration of database system | 10 |
| b. | Coding of queries | 40 |
| с. | Quality of result displayed by queries. | 30 |
| d. | Answer to sample questions | 10 |
| e. | Submit assignment in time | 10 |
| | Total | |

6. MAJOR EQUIPMENT/ INSTRUMENTS REQUIRED

The major equipment with broad specification mentioned here will usher in uniformity in conduct of practical, as well as aid to procure equipment by authorities concerned.

| Sr.No. | Major Equipment/ Instruments Required | PrO. No. |
|--------|---|----------|
| 1 | Computer system (Any computer system with basic configuration) | All |
| 2 | Any RDBMS software (MySQL/Oracle/SQL server/MongoDB or any other) All | All |

7. THEORY COMPONENTS

The following topics/subtopics should be taught and assessed in order to develop UOs for achieving the COs to attain the identified competency.

| | Unit Outcomes (UOs) (in cognitive domain) | Topics and Sub-topics |
|---|--|---|
| | UNIT 1. INTRODUCTIO | N TO DATABASE SYSTEM (Weightage-12, Hrs-08) |
| 1b. I 1b. I 1c. S 1d. I 1e. I 1f. I 1g. I | State importance of database management system. Define data, database, DBMS, data independence, data abstraction, and schema. State Codd's laws. Describe Overall structure of DBMS. Describe architecture of DBMS. Distinguish Hierarchical, networking and relational data model. Describe data mining, data warehousing, big data and | 1.1 Database concepts: Data, Database, Database management system, File system verses DBMS, Applications of DBMS, Data Abstraction, Data Independence, Database Schema, The Codd's rules, Overall structure of DBMS 1.2 Architecture: Two tier and Three tier architecture of DBMS. 1.3 Data Models: Hierarchical, Networking, Relational Data Models. 1.4 Advanced database concepts: Data mining, Data Warehousing, Introduction to Big data and Mongo DB. |

| | Mongo DB. | | | | |
|------------|---|--|--|--|--|
| | | | | | |
| | | | | | |
| | | | | | |
| | | | | | |
| | | | | | |
| | UNIT 2 RELATIO | NAL DATA MODEL (Weightage- 14 , Hrs- 10) | | | |
| 2a. | Define table, row, column, | | | | |
| | domain, attribute, key, strong entity set and weak entity set. | 2.1 Relational Structure- Tables (Relations),Rows(Tuples), Domains, attributes | | | |
| 2b. | | 2.2 Keys: Super Keys, Candidate Key, Primary Key, Foreign Key.2.3 Data Constraints: Not Null, Unique, Primary Key, Foreign Key, | | | |
| | Describe data constraints. | Check, Default. 2.4 Normalization -Normalization based on functional | | | |
| 2d. | Describe database design in terms of 1NF, 2NF and 3NF. | 2.4 Normalization -Normalization based on functional dependencies, Normal forms: 1NF, 2NF, 3NF. | | | |
| | Describe conceptual design. | 2.5 Entity Relationship Model,-Strong Entity set, Weak Entity set, Types of Attributes, E.B. Diagrams | | | |
| 2f. | Draw an ER diagrams. | Types of Attributes, E-R Diagrams. | | | |
| | UNIT 3 SQL AND NoSQL (Weightage-14, Hrs-12) | | | | |
| | Enlist oracle data types. | 3.1 SQL: Invoking SQL*PLUS, The Oracle Data-types ,Data | | | |
| 36. | Compare DDL, DML, DCL and TCL. | Definition Language (DDL), Data Manipulation language (DML), data control language (DCL), Transaction control | | | |
| 3c. | Write SQL queries on DDL, DML, DCL and TCL. | language (TCL). 3.2 Clauses & Join: Different types of clauses in SQL. Joins, | | | |
| 3d. | Describe clauses and Joins | Types of Joins, Nested queries. | | | |
| 3e. | with its types. Write SQL queries to evaluate | 3.3 Operators: Relational, Arithmetic, Logical, set operators.3.4 Functions: Date and time, String functions, Aggregate | | | |
| 3f. | use of clauses and joins. Enlist operators and compare | Functions. | | | |
| 51. | between Relational, | 3.5 Introduction to NoSQL- Structured versus Unstructured Data, NoSQL database concepts-Types of NoSQL | | | |
| | Arithmetic, Logical, set operators. | databases, NoSQL data modeling, Benefits of NoSQL, | | | |
| 3g. | Write SQL queries to evaluate | comparison between SQL and NoSQL database system. | | | |
| 3h. | use of operators. Enlist functions and compare | | | | |
| | Date, time, String functions | | | | |
| 3i. | and Aggregate Functions. Write SQL queries to evaluate | | | | |
| | use of functions. | | | | |
| 3j. 3k. | Compare SQL with NoSQL Enlist Benefits of NoSQL | | | | |
| JA. | Line Deletite of 100QL | | | | |
| | | | | | |

| | UNIT 4 SQL PERI | FORMANCE TUNING (Weightage- 10, Hrs- 08) |
|--|---|---|
| 4b. 4c. 4d. | Define view, sequence and index. Describe view with its types. Write SQL queries to create view and perform different operations on it. Write SQL queries to create sequence and perform different operations on it. Describe types of indexes. Write SQL queries to create index and perform different operations on it. | 4.1 Creating Views, Views: Types of Views: Read Only View and Updatable Views, Dropping Views. 4.2 Sequences: Creating Sequences, Altering Sequences, Dropping Sequences 4.3 Indexes: Index Types, Creating of an Index: Simple Unique, and Composite Index, Dropping Indexes. |
| | UNIT | 5 PL/SQL (Weightage-14, Hrs-12) |
| 5b. 5c. 5d. 5e. 5f. 5g. | Define Exception and Cursors. Enlist PL/SQL data types. State advantages of PL/SQL. Describe control structure with its types. Write PL/SQL block to evaluate use of different control structures. Describe exception handling with its types. Write PL/SQL block to create different types of Exception. Describe working of cursors. Distinguish between Implicit and Explicit cursors. Write PL/SQL block to create different types of cursors. | 5.1 Introduction of PL/SQL: The PL/SQL Syntax, The PL/SQL Block Structure, PL/SQL data types, Advantages of PLSQL. 5.2 Control Structure: Conditional Control, Iterative Control, Sequential Control. 5.3 Exception handling: Predefined Exception, User defined Exception. 5.4 Cursors: Implicit and Explicit Cursors |
| U | NIT 6 PL/SQL DATABASE (| DBJECTS AND DATABASE ADMINISTRATION OVERVIEW (Weightage- 16, Hrs- 14) |
| 6a. | Define Procedure, Function | 6.1 Procedures: Advantages, Creating, Executing and Deleting |
| 6b. | and Trigger. State advantages of procedure. | a Stored Procedure 6.2 Functions: Advantages, Creating, Executing and Deleting a Function. |
| 6c. | Describe working of stored procedure. | 6.3 Database Triggers: Use of Database Triggers, Types of Triggers, Syntax for Creating Trigger, Deleting Trigger. |
| | Write PL/SQL block to create stored procedures. | 6.4 Introduction to database administration: Types of database users, Creating and deleting users, Assigning privileges to |
| | Describe working of triggers. | users |
| | Write PL/SQL block to create different types of triggers. Describe roles and | 6.5 Database Backup-Types of failure, Causes of failure and database backup. |
| ~5. | responsibilities of database | |

8. SUGGESTED SPECIFICATION TABLE FOR QUESTION PAPER DESIGN

| Unit | Unit Title | Teaching | Distribution of Theory Marks | | | |
|----------------------------------|---------------------------------|----------|------------------------------|-------|-------|-------|
| No. | | Hours | R | U | Α | Total |
| | | | Level | Level | Level | Marks |
| Ι | Introduction to Database system | 08 | 06 | 06 | 00 | 12 |
| II | Relational Data Model | 10 | 04 | 04 | 06 | 14 |
| III | SQL and NoSQL | 12 | 04 | 04 | 06 | 14 |
| IV | SQL Performance Tuning | 08 | 02 | 04 | 04 | 10 |
| V | PL/SQL | 12 | 04 | 04 | 06 | 14 |
| VI | PL/SQL Database Objects and | 14 | 04 | 06 | 06 | 16 |
| Database administration Overview | | | | | | |
| | Total | 64 | 24 | 28 | 28 | 80 |

9. SUGGESTED STUDENT ACTIVITIES

Other than the classroom and laboratory learning, following are the suggested student-related *co-curricular* activities which can be undertaken to accelerate the attainment of the various outcomes in this course: Students should conduct following activities in group and prepare reports of about 5 pages for each activity, also collect/record physical evidences for their (student's) portfolio which will be useful for their placement interviews:

a. Prepare journals based on practicals performed in laboratory.

10. SUGGESTED SPECIAL INSTRUCTIONAL STRATEGIES (if any)

These are sample strategies, which the teacher can use to accelerate the attainment of the various outcomes in this course:

- a. Massive open online courses (*MOOCs*) may be used to teach various topics/sub topics.
- b. About *15-20% of the topics/sub-topics* which is relatively simpler or descriptive in nature is to be given to the students for *self-directed learning* and assess the development of the Cos through classroom presentations (see implementation guideline for details).
- c. With respect to item No.8, teachers need to ensure to create opportunities and provisions for *co-curricular activities*.
- d. Guide student(s) in undertaking micro-projects.
- e. Correlate subtopics with power plant system and equipments.
- f. Use proper equivalent analogy to explain different concepts.
- g. Use Flash/Animations to explain various components, operation and
- h. Teacher should ask the students to go through instruction and Technical manuals

11. SUGGESTED MICRO-PROJECTS (Only for Class Declaration Courses)

Only one micro-project is planned to be undertaken by a student that needs to be assigned to him/her. In the first four semesters, the micro-project are group-based. However, in the fifth and sixth semesters, it should be preferably be **individually** undertaken to build up the skill and confidence in every student to become problem solver so that s/he contributes to the projects of the industry. In special situations where groups have to be formed for micro-projects, the number of students in the group should **not exceed three**.

The micro-project could be industry application based, internet-based, workshopbased, laboratory-based or field-based. Each micro-project should encompass two or more Cos which are in fact, an integration of PrOs, Uos and ADOs. Each student will have to maintain dated work diary consisting of individual contribution in the project work and give a seminar presentation of it before submission. The total duration of the micro-project should not be less than **16** (sixteen) student engagement hours during the course. The student ought to submit micro-project by the end of the semester to develop the industry oriented Cos.

A suggestive list of micro-projects is given here. Similar micro-projects could be added by the concerned faculty:

- a) Design and develop database for library management system.
- b) Design and develop database for Hospital management system.
- c) Any other micro projects suggested by subject faculty on similar line.

12. SUGGESTED LEARNING RESOURCES

| S.N | Title | Author, Publisher, Edition and Year of publication | ISBN Number | |
